

W ELECTRICAL HYDRO TEST PUMP

EPUMP700

Product Profile:

- WASSERTEK electric operated hydro test pump ideally used for exact and quick compression testing & leak testing on pipe work systems and containers in heating and sanitary installation, and in boiler and vessel manufacturing available up to 700bars.
- Easy to transport with 4 Wheel.
- High precision test pump.

Product Specifications

| | |
|-----------------------------------|-------------------------------|
| Model No. | EPUMP700 |
| Maximum Pressure | 700 bars. 10150 psi. 70Mpa |
| Input Voltage Requirements | 380V, 50/60Hz, 3P |
| Motor Power | 27 KW |
| Rotating Speed Flow Rate | 21 L/Min. |
| Outlet Hose Lenth | 5 Meters |
| Testing Fluid | Water |
| Handling | Mobile Handcart with 4 wheels |
| Weight | 330 Kgs. |
| Dimensions (MM) | 1500 * 1100 * 1400 MM |
